## **FUNDING AND GRANT APPLICATIONS FOR EDUCATION**

### **Why use a consultant?**

Using a Consultant to work with your organisation to source appropriate funding for specific projects will allow for dedicated time to focus solely on the task required.

With access to specific funding databases and extensive experience in grant and funding searches success rates can be increased.

Application procedures and forms can either be complex or too time-consuming and some of the key decision-making criteria might not easily be accessible. It can often be difficult to know how best to proceed with a particular application and to improve the chances of success.

Understanding the process of gathering data to support applications and sourcing relevant documentation can be time consuming and difficult to analyse to match specific funding requirements and objectives.

*A consultant will have a huge impact on increasing the financial sustainability of your organisation and providing resources, one-off projects, and capital investment that can create a positive influence on academic achievement.*

**Lisa Turner** has over 15 years experience of working within education, higher education and charity organisations.

Examples of successful funding applications have been for:

- **New school buildings**                      **£80k**
- **Major refurbishment projects**   **£150k**
- **Community vocational project**   **£40k**
- **Sporting organisation**                      **£225k**
- **Mini Bus for a Charity**                      **£27k**
- **Multi-Use games area**                      **£175k**

**LEADING, INSPIRING, SHAPING, ACHIEVING**

## Our Services

*'Helping your organisation is our business.'*

As specialist funding consultants we provide our clients with a range of services relating to grants and other complementary private and public sector funding, including organisations providing support to charities and others operating in the Third Sector.

- We can prepare and complete a strategic business plan that will support a grant application or funding proposal
- We can work with you on the preparation of one or more parts of the documentation
- We can guide you through the various processes involved in submitting your applications.
- We can guide you through the claim and monitoring processes.
- We can provide you with vital ongoing support and consultancy
- We can prepare reports on different types of funding and other resources available in different areas of the UK

## COSTS

Costs will vary according to the complexity of the project and an initial meeting will establish the requirements of the organisation and the work to be undertaken.

An average project from initial strategy formation and business planning to grant sourcing, bid writing and project management will be approx 8% of the overall project cost.
